

USER HANDBOOK

HR & Payroll Management Platform

A practical, step-by-step guide for employees and HR administrators to check in, request leave and overtime, run payroll, and manage the organization.

Audience: All staff (Employee, HR Admin, Super Admin roles)

Covers: Login & navigation, Attendance, Leave, Overtime, Payroll, Payslips, Employees, Organization Settings

Version: 1.0 | August 2026

Getting Started

Logging in

Open the platform in your browser and sign in with the email and password your HR administrator gave you.

- 1 Enter your work **email** and **password** on the sign-in screen.
- 2 Select `Sign in`.
- 3 You'll land on your dashboard automatically — which one depends on your role (see below).

NOTE

If HR created your account without a password, a temporary one is shown to HR once at creation time. Ask your HR administrator for it if you weren't given one directly.

Understanding your role

What you can see and do depends on your role. There are three roles in the system:

ROLE	WHO IT'S FOR	WHAT YOU GET
Employee	Every staff member with an employee record	My Dashboard, Attendance, Leave, Overtime, Payslips — all scoped to yourself
HR Admin	HR/People-ops staff	Everything an Employee has, plus the HR Dashboard, Employees, Payroll, and Settings
Super Admin	Platform owner	Everything HR Admin has, plus editing organization-wide settings (name, timezone, currency, payroll cycle)

A person can be *both* an HR Admin and an employee (e.g. an HR manager who also clocks in) — in that case you'll see both "HR Dashboard" and "My Dashboard" in the top navigation.

Navigating the app

The top navigation bar is available on every page:

- **Logo** (top-left) — click it anytime to jump back to your home dashboard.
- **Menu items** — only the sections your role can access are shown. The current page is highlighted.
- **Avatar menu** (top-right, your initials) — shows your email and role, and is where you `Log out`.

TIP

On a narrower window, menu labels shrink to icons only to save space — hover an icon to confirm what it opens, or widen the window to see full labels.

SECTION 2

Employee Guide

My Dashboard EMPLOYEE

Your personal home screen, reachable from **My Dashboard** in the top nav. It shows, at a glance:

- Whether you're checked in today, with quick **Check in** / **Check out** buttons
- How many of your leave and overtime requests are still pending
- Your current leave balances by leave type
- Your most recently released payslip

Attendance EMPLOYEE

You can check in and out either from **My Dashboard** or the dedicated **Attendance** page, which also lists your full check-in/check-out history.

- 1 Select **Check in** when you start work. This records the current time.
- 2 Select **Check out** when you finish. Your worked duration is calculated automatically.

NOTE

You can only have one open session per day — you can't check in again until you've checked out. If a check-in or check-out is wrong (wrong time, forgot to check out), ask HR to apply a correction; employees cannot edit past attendance records directly.

Leave EMPLOYEE

Open **Leave** to see your leave balances (also on My Dashboard) and your request history.

Requesting leave

- 1 On the Leave page, select **New request**.
- 2 Choose a **leave type** (paid types are marked; unpaid types are labeled "unpaid").
- 3 Pick a **start date** and **end date**.
- 4 Optionally add a **reason**.
- 5 Select **Submit request**. It appears with status **PENDING** until HR reviews it.

You can **Cancel** a request while it's still **PENDING** or already **APPROVED** (as long as it hasn't started).

Overtime EMPLOYEE

Open **Overtime** to request overtime hours and track your requests.

- 1 Select **New request** .
- 2 Enter the **start time** and **end time** for the overtime worked.
- 3 Optionally set a **multiplier** (defaults to 1.5×) if your policy uses a different rate.
- 4 Select **Submit request** .

NOTE

Once an overtime request is **APPROVED** , it's locked in for payroll and can no longer be cancelled — only a request that's still **PENDING** can be withdrawn.

Payslips

EMPLOYEE

Open **Payslips** to see every payslip HR has released to you, or view your latest one directly from My Dashboard. Select any row to open the full breakdown: earnings (basic salary, allowances, approved overtime, bonus), deductions, and net pay.

TIP

A payslip only appears once HR has approved that month's payroll run and released it — see Section 3 for how that process works from the HR side.

SECTION 3

HR Administrator Guide

Everything below is available to HR Admins and Super Admins. You keep full access to the Employee features in Section 2 as well.

HR Dashboard HR ADMIN

Your organization-wide operational snapshot, open by default at HR Dashboard. It surfaces active employee count, who's present today, who's on leave, pending leave/overtime requests awaiting your action, and the current payroll run's status and net cost. The **Quick actions** panel at the bottom links straight to the sections below.

Employees HR ADMIN

Adding an employee

- 1 Open Employees and select New employee.
- 2 Fill in **email**, an optional **password** (a temporary one is generated if left blank — shown once after creation), and an optional **employee number** (auto-generated if left blank).
- 3 Set **join date**, **department**, **position**, and **work model** (Office / Hybrid / Remote).
- 4 Select Create employee. The new record starts in DRAFT status.

Employee lifecycle

Open an employee's detail page to change their status as they move through their time at the company:

FROM	AVAILABLE ACTIONS
DRAFT	Activate → becomes ACTIVE
ACTIVE	Deactivate → INACTIVE , or Terminate (requires confirmation) → TERMINATED
INACTIVE	Activate → back to ACTIVE , or Terminate
TERMINATED	Final — no further transitions

From the same page you can also Edit department/position/work model/join date, and manage the **Salary profile**: basic salary, effective date, allowances, deductions, and overtime settings (standard monthly hours and working days used as the OT/unpaid-leave basis). Changing salary keeps prior profiles in a dated history — past payslips are never affected by later salary changes.

Leave management HR ADMIN

Open **Leave** — as an HR Admin you get three tabs:

- **Requests** — every leave request org-wide, filterable by employee and status. For anything **PENDING**, select **Approve** or **Reject**.
- **Balances** — grant a leave balance to an employee (leave type, period, entitled days) and browse existing balances.
- **Types** — create leave types and mark whether each is paid or unpaid.

Overtime management HR ADMIN

Open **Overtime** to see every request org-wide, filterable by employee and status. **Approve** or **Reject** anything **PENDING**. Approved hours flow automatically into that employee's next payroll calculation.

Payroll HR ADMIN

Open **Payroll** to see every monthly run and its status.

Running payroll for a month

- 1 Select **New run** and choose the month/period, then **Create**. The run starts as **DRAFT**.
- 2 Open the run and select **Calculate** (or **Recalculate** to re-run it) — this computes gross pay, approved overtime, deductions, and net pay per employee using each person's current salary profile, approved overtime, and approved leave. The run becomes **CALCULATED**.
- 3 Review the totals and per-employee breakdown, then select **Approve**. **This step releases a payslip to every included employee** — they'll immediately see it under their Payslips.
- 4 Once payment has actually been made outside the system, come back and select **Mark as paid** to close the run out as **PAID**.

IMPORTANT

Approving a payroll run is what makes payslips visible to employees — double-check the calculated totals before approving. You can safely recalculate as many times as needed while the run is still in DRAFT/CALCULATED, before approval.

Organization Settings HR ADMIN

Open **Settings** for three tabs:

- **Organization** — company name, timezone, currency, and payroll cycle. Editing these values is **Super Admin only**.
- **Departments** — create, rename, and activate/deactivate departments.
- **Positions** — create, edit, and activate/deactivate job positions, each tied to a department.

Departments and positions must be **ACTIVE** to be selectable when creating or editing an employee.

SECTION 4

Roles & Permissions

A quick reference for what each role can see and do across the platform.

AREA	EMPLOYEE	HR ADMIN	SUPER ADMIN
My attendance / leave / overtime / payslips	View & submit, own records only	Full	Full
Org-wide attendance / leave / overtime	—	View & approve	View & approve
Attendance corrections	—	Yes	Yes
Employees (create / edit / lifecycle)	—	Full	Full
Salary profiles	—	Full	Full
Payroll runs (create / calculate / approve / mark paid)	—	Full	Full
Departments & Positions	—	Full	Full
Organization profile (name, timezone, currency, cycle)	—	View only	Edit

NOTE

If a menu item or button described in this handbook isn't visible to you, it's almost always because your role doesn't include that permission — check the table above, or ask your HR administrator.

Status Glossary

Status labels you'll see throughout the app, and what each one means.

Leave & Overtime requests

STATUS	MEANING
PENDING	Submitted, waiting on HR review
APPROVED	HR approved it; leave balance is deducted / OT counts toward payroll
REJECTED	HR declined the request
CANCELLED	Withdrawn by the employee (or by HR)

Employees

STATUS	MEANING
DRAFT	Account created, not yet activated
ACTIVE	Currently employed and able to use the platform
INACTIVE	Temporarily paused (e.g. long leave) — can be reactivated
TERMINATED	No longer employed — final, cannot be reversed

Departments & Positions

STATUS	MEANING
ACTIVE	Selectable when creating/editing an employee
INACTIVE	Hidden from selection, existing assignments unaffected

Payroll runs

STATUS	MEANING
DRAFT	Created for a period, not yet calculated
CALCULATED	Totals computed; awaiting HR approval before payslips are released
APPROVED	Payslips released to employees; awaiting actual payment
PAID	Payment completed — the run is closed out

Frequently Asked Questions

"I can't check out — the button isn't there"

You'll only see **Check out** if you have an open check-in for today. If you never checked in, use **Check in** first; if you already checked out today, that session is closed — ask HR for a correction if the times are wrong.

"My leave balance looks wrong"

Balances are granted per leave type and period by HR (Leave → Balances). If a balance is missing or incorrect for the current period, ask your HR administrator to grant or adjust it.

"I submitted a leave/overtime request by mistake"

Cancel it yourself while it's still **PENDING** (leave requests can also be cancelled after approval, as long as they haven't started). Once overtime is approved, only HR can help.

"Why can't I see my payslip yet?"

Payslips appear only after HR **approves** that month's payroll run (not just calculates it). Check with HR on the run's status if it's overdue.

"I don't see the menu item I need"

Navigation only shows what your role can access — see Section 4, Roles & Permissions. If you believe you're missing access you should have, ask your HR administrator.

"Can I edit a past salary or payslip?"

No — salary changes only apply going forward from their effective date, and already-released payslips are locked snapshots so they stay accurate even if salary changes later. To fix a mistake, HR creates a new salary profile effective from the correct date.

"An employee/department/position I need isn't in the dropdown"

Only **ACTIVE** departments and positions are selectable. Reactivate them under Settings, or check whether the employee's status excludes them from the picker you're using.
