

USER HANDBOOK · SPRINT 2 SUPPLEMENT

HR & Payroll Management Platform

Sprint 2 New Features

A practical, step-by-step guide to what Sprint 2 added: geofenced attendance, expense claims, in-app notifications, and the internal recruitment/ATS pipeline.

Companion document. This handbook only covers what Sprint 2 changed or added. For login, roles, and the core Attendance / Leave / Overtime / Payroll / Payslips / Employees / Organization Settings workflows, see *HR_Payroll_User_Handbook.pdf* (Sprint 1, v1.0) — those all still work exactly as documented there.

Audience: All staff, plus the new Hiring Manager role

Covers: Geofenced Attendance, Expense Claims, Notifications, Recruitment/ATS, updated Roles & Permissions

Version: 2.0 | September 2026

Contents

1	What's New in Sprint 2	3

7	Status Glossary	14
	Every new status label and what it means	
8	Frequently Asked Questions	16

What's New in Sprint 2

Sprint 1 covered the core employee-to-payslip flow. Sprint 2 adds four things people asked for after launch: a real way to restrict office check-ins to the workplace, a way to know when your requests are decided, a way to claim expenses, and a way to run hiring inside the same platform.

FEATURE	WHAT IT DOES	WHO NOTICES IT
Geofenced Attendance	HR can require office staff to be physically at a work location to check in	Office employees; HR configures it
Expense Claims	Employees submit expenses with receipts; HR approves them; approved amounts flow into the next payslip	Everyone
Notifications	A bell icon and inbox tell you when a request you care about is decided	Everyone
Recruitment / ATS	HR posts jobs, tracks candidates through a hiring pipeline, sends offers, and converts a hired candidate straight into a new employee account	HR and the new Hiring Manager role

A new role: Hiring Manager

Sprint 2 introduces a fourth role. Unlike Employee, HR Admin, and Super Admin, a Hiring Manager is a **login-only account** — it does not have an employee record, so it never appears in the Employees list and never has attendance, leave, overtime, payroll, or an expense inbox of its own.

- HR creates the account (see *Section 5 — Hiring Managers*) and assigns it to specific job postings or candidates.
- A Hiring Manager only sees the candidates it has been explicitly assigned — never the full pipeline, never compensation or offer details.
- When a Hiring Manager logs in, the app takes them straight to the **Recruitment** page — there is no dashboard for this role.
- Its side navigation is intentionally small: **Recruitment**, **About**, and **Contact** only.

NOTE

Everything from the Sprint 1 handbook — logging in, the three original roles, navigation basics — still applies unchanged. This document only adds what's new.

Geofenced Attendance

Every organization can now choose how strictly it wants to enforce *where* an office-based employee checks in from. This lives entirely in a new **Geofence** tab and only ever affects employees whose Work Model is set to **Office** — Hybrid and Remote employees are always exempt, no matter what the policy is set to.

Setting the location policy

HR ADMIN

Open **Settings** and select the **Geofence** tab (alongside Organization, Departments, and Positions).

POLICY	WHAT IT DOES
None — never capture location	No coordinates are captured at check-in/out, for anyone.
Log only — capture for visibility, never blocks check-in	Coordinates are captured when available and shown to HR, but a check-in never fails because of location. This is the default.
Geofence enforced — office employees must check in inside a zone	For Office employees only: location becomes required, and check-in is rejected if they're outside every configured zone.

Defining geofence zones

- 1 Under "Geofence zones," select **New zone**.
- 2 Enter a **Label** (e.g. "Head Office"), **Radius (meters)**, and the **Latitude / Longitude** of the location's center.
- 3 Select **Add zone**.

Each zone appears in a table with its label, center coordinates, radius, and status. There's no hard delete — select **Deactivate** on a zone you no longer need; it stays in the list as **INACTIVE** and is excluded from enforcement. You can define multiple zones (e.g. two office branches); a check-in inside *any* one active zone passes.

IMPORTANT

If you turn on **Geofence enforced** before adding at least one active zone, every office employee's check-in will fail — there's nothing to be "inside." Add your zones first, then switch the policy.

What changes at check-in EMPLOYEE

Nothing about the Attendance page's layout changes — you still use the same Check in / Check out buttons on My Dashboard or the Attendance page. What changed is what happens behind the button:

- Your location is captured automatically the moment you select Check in or Check out — your browser may prompt you to allow location access.
- Under **None** or **Log only**, this never blocks you — if location is denied, unavailable, or times out, your check-in still goes through.
- Under **Geofence enforced**, and only if you're an **Office** employee, location becomes required and must fall inside a configured zone.

If your check-in is rejected under Geofence enforced, you'll see one of these two messages directly under the Check in / Check out buttons:

- *"Location is required to check in under this organization's geofence policy"* — your browser didn't share a location. Allow location access and try again.
- *"Check-in location is outside every configured geofence zone"* — you're not physically inside any zone HR configured. Move to a valid location, or contact HR if you believe this is wrong.

NOTE

Only **check-in** is ever geofenced. Checking out never fails because of location — it only needs an open session, exactly as in Sprint 1.

On the Attendance page, any record captured with GPS now shows a small 📍 **Located** badge in a new **Location** column — hover it to see the exact coordinates recorded for check-in and check-out. Records without a location simply show a dash.

TIP

A rejected check-in is never saved as an attendance record — it's logged only for HR's troubleshooting, so it won't show up as a gap in your history once you successfully check in.

Expense Claims

Open **Expenses** in the navigation to submit a claim or, for HR, to review everyone's claims.

Submitting a claim **EMPLOYEE**

- 1 Under "My expenses," select **New claim**.
- 2 Choose a **Category**, enter the **Amount** and **Expense date**, and optionally a **Description**.
- 3 Select **Create claim**. It's saved as **DRAFT** — nothing is sent to HR yet.
- 4 While it's still Draft, select **+ Add receipt** to attach supporting documents (JPEG, PNG, or PDF; up to 10 MB per file, up to 5 files per claim).
- 5 When ready, select **Submit**. This locks the claim from further edits and sends it to HR as **SUBMITTED**.

IMPORTANT

Some categories require a receipt. If you try to submit without attaching one, you'll see: *"This expense category requires at least one receipt before submission"*. Add a receipt first.

You can **Cancel** a claim any time before HR decides it — while it's Draft or Submitted. Once HR approves or rejects it, it's final; there's no re-opening a decided claim. If HR rejects your claim, the reason they gave appears in red under the status on your own claims list.

Reviewing and paying claims **HR ADMIN**

Managing categories

Under "Expense categories," select **New category**, give it a name, and optionally check **Requires receipt**. Category names must be unique within your organization.

Approving or rejecting

- 1 Under "All expense claims," use the status filter (defaults to Submitted) to find claims awaiting a decision.
- 2 For any Submitted claim, select **Approve** or **Reject**.
- 3 Rejecting asks for a reason — this is required and is shown to the employee.

Only Submitted claims can be decided; an already-decided claim can't be approved or rejected again.

How approved claims reach payroll

There's no separate "pay this expense" button. Reimbursement happens automatically as part of running payroll, the same way approved overtime does:

- When HR **Calculate**s (or **Recalculate**s) a payroll run, the system finds every **APPROVED** claim for that employee whose **expense date falls inside the payroll period** and hasn't been reimbursed yet.
- Those amounts are added into the employee's gross pay for that run, and the claims flip to **REIMBURSED**.
- If HR recalculates a run, any claims it had already reimbursed are put back to Approved first, then re-matched — so nothing is double-counted or stranded.

NOTE

An employee's approved claim quietly becomes Reimbursed once the right payroll run is calculated — there's nothing extra for the employee to do, and no separate expenses payment step for HR to remember.

Notifications

A bell icon now sits in the top header for every user, on every role. It shows a small red dot whenever you have at least one unread notification (checked automatically about every 30 seconds). Select it to open your inbox.

Your inbox

The **Notifications** page lists your most recent notifications, newest first. Unread ones are highlighted; select **Mark read** on any item to clear it. There's no "mark all as read" — notifications are cleared one at a time.

Email preferences

Below your inbox, a checklist lets you choose which of the events below also send you an email — each is on by default. **In-app notifications can't be turned off**; email is the only thing you control per event.

What triggers a notification

EVENT	WHO'S NOTIFIED
Leave request submitted	HR Admins
Leave request decided	The employee who requested it
Overtime request decided	The employee who requested it
Payslip released	Every employee included in that payroll run
Expense claim decided	The employee who submitted it
Interview scheduled	The Hiring Manager assigned to that candidate
Offer response received	HR Admins

NOTE

For privacy, emails never include salary figures, expense amounts, or your GPS location — they just point you back into the app. The full detail is always in the in-app inbox.

Recruitment / ATS

Open **Recruitment** in the navigation. HR Admins and Super Admins see three tabs — **Pipeline**, **Postings**, and **Hiring Managers**. A Hiring Manager sees only their Pipeline view, relabeled "My assigned candidates."

NOTE

There is no public careers page or candidate login in this release. Candidates are entered manually by HR or a recruiter — recruitment stays entirely internal to your team.

Creating Hiring Manager accounts **HR ADMIN**

- 1 On the **Hiring Managers** tab, enter an **email** and select **Create account**.
- 2 A one-time banner shows a temporary password — copy it and share it securely; it will not be shown again.

This creates a login-only account, not an employee record. Existing accounts and their status (Active/Inactive) are listed below the form.

Posting a job **HR ADMIN**

- 1 On the **Postings** tab, select **New posting**.
- 2 Enter a **Title** and **Employment type**, choose a **Department**, then a **Position** within it, and set the number of **Openings**.
- 3 Select **Create posting**. It starts as **DRAFT**.

Change a posting's status any time using the inline dropdown in its row: Draft, Open, Closed, or Archived. Postings are never deleted — archive one you're done with instead.

Adding a candidate

HR ADMIN

- 1 From a posting's row, select **Add candidate**.
- 2 Enter their **Full name** and **Email**, and optionally **Phone** and **Source** (e.g. referral, job board).
- 3 Optionally attach a **Resume** (PDF, JPEG, or PNG; up to 5 MB).
- 4 Select **Add candidate**. This creates the candidate and their application to this posting in one step, starting at stage **APPLIED**.

NOTE

The same candidate can't have two open applications to the same posting at once — you'll see *"This candidate already has an open application to this posting"* if you try.

Working the pipeline

HR ADMIN

HIRING MANAGER

The **Pipeline** tab lists every candidate application, filterable by stage. HR can assign or reassign each application to a Hiring Manager from a dropdown right in the table; a Hiring Manager's own view is always limited to applications assigned to them, regardless of any filter chosen.

Select **View** on any row to open its detail page.

Pipeline stage rules

- Stages move forward only: Applied → Screening → Interview → Offer → Hired.
- Rejected and Withdrawn are the two exceptions — either can be set from any stage that isn't already final.
- A Hiring Manager can advance an assigned candidate to Screening or Interview, or set Rejected/Withdrawn — but never Offer or Hired directly.
- **Offer** is only reached by HR sending an actual offer, and **Hired** is only reached by converting an accepted offer into an employee (see below) — neither has its own "advance stage" button.

The application detail page

Opening a candidate's [View](#) link shows everything about that application in one place:

Candidate info & stage actions

Name, email, phone, source, and a resume download link if one was uploaded. Below it, contextual buttons appear depending on the current stage — for example [Advance to Screening](#) from Applied, or [Advance to Interview](#) from Screening — plus [Reject](#) and [Mark withdrawn](#), always available until the application reaches a final stage.

HR can also assign or change the **Hiring manager** for this specific application from here.

Interviews

HR ADMIN

ASSIGNED HIRING MANAGER

- 1 Under "Schedule interview," set the **date and time**, choose **Onsite** or **Remote**, and optionally list interviewers.
- 2 Select [Schedule interview](#). It's created as **SCHEDULED**.
- 3 After it happens, enter **Feedback** and a **Score** directly on the interview row and select [Save](#) — this automatically marks it **COMPLETED**.

Offers

HR ADMIN ONLY

- 1 Once you're ready, fill in **Proposed salary**, **Currency**, and **Start date**, then select [Send offer](#). It's created and sent in one step, status **SENT**, and the application automatically advances to the Offer stage.
- 2 When the candidate responds, record it yourself: select [Record accepted](#) or [Record declined](#). There's no candidate-facing portal — this is a manual step based on what the candidate told you.
- 3 Changed your mind before they respond? Select [Rescind](#).

Only one active offer (Sent, not yet responded to) is allowed per application at a time, and compensation details are never visible to a Hiring Manager — only HR sees or sets salary and offer terms.

Converting a candidate to an employee HR ADMIN

Once an offer's status is **ACCEPTED**, a **Convert to employee** button appears on the application page.

- 1 Select **Convert to employee**.
- 2 The platform creates a real employee record and login account in one step — using the candidate's name, department, position, and the offer's start date and salary — and marks the application **HIRED**.
- 3 A one-time banner shows the new account's temporary password — share it with your new hire the same way you would for any manually onboarded employee.

IMPORTANT

Converting is a one-way action — an application can only be converted once, and only after its offer has been marked Accepted. From this point on, manage the person as a regular employee (Employees page, salary profile, attendance, and so on) — Recruitment keeps only a link back to their record for your history.

SECTION 6

Roles & Permissions (Updated)

The Sprint 1 roles table still applies. Here's what Sprint 2 adds, including the new Hiring Manager row.

AREA	EMPLOYEE	HIRING MANAGER	HR ADMIN	SUPER ADMIN
Geofence policy & zones	—	—	Full	Full
My expense claims	Submit & view own	Submit & view own*	Full	Full
Expense approvals & categories	—	—	Full	Full
My notifications	Own inbox	Own inbox	Own inbox, plus manage templates	Full
Job postings	—	View assigned only	Full	Full
Candidates & pipeline	—	Assigned only; no compensation visibility	Full	Full
Offers	—	—	Full	Full
Candidate-to-employee conversion	—	—	Full	Full

* A Hiring Manager has no employee record, so in practice it has no attendance, leave, overtime, payroll, or expense claims of its own.

NOTE

Hiring Manager access is scoped per assignment, not just by role — being a Hiring Manager doesn't grant visibility into every posting or candidate, only the ones HR has explicitly assigned.

Status Glossary

New status labels introduced in Sprint 2. All Sprint 1 statuses (leave/overtime requests, employees, departments & positions, payroll runs) are unchanged.

Geofence zones

STATUS	MEANING
ACTIVE	Included when checking whether a check-in falls inside a zone
INACTIVE	Deactivated by HR; kept for history, excluded from enforcement

Expense claims

STATUS	MEANING
DRAFT	Created but not submitted; only the owner can edit it, add receipts, or cancel it
SUBMITTED	Sent to HR for review; the owner can still cancel it
APPROVED	HR approved it; waiting for the next matching payroll run
REJECTED	HR declined it, with a reason shown to the employee
REIMBURSED	Paid out automatically once the matching payroll run was calculated
CANCELLED	Withdrawn by the employee before HR decided it

Job postings

STATUS	MEANING
DRAFT	Not yet actively hiring, though candidates can still be added
OPEN	Actively hiring
CLOSED	No longer accepting new candidates
ARCHIVED	Retired; kept for history

Candidate application stage

STAGE	MEANING
APPLIED	Starting point when a candidate is added
SCREENING	Under initial review
INTERVIEW	Interview stage reached
OFFER	An offer has been sent
HIRED	Converted into an employee account — final
REJECTED	Candidate declined by HR/Hiring Manager — final
WITHDRAWN	Candidate withdrew — final

Interviews

STATUS	MEANING
SCHEDULED	Set up, not yet happened
COMPLETED	Feedback has been recorded
CANCELLED	Called off

Offers

STATUS	MEANING
SENT	Sent to the candidate; awaiting their response
ACCEPTED	Candidate accepted; ready to convert to an employee
DECLINED	Candidate declined — final
RESCINDED	HR withdrew it before a response — final

Frequently Asked Questions

"My check-in was rejected — why?"

Your organization has Geofence enforced turned on and you're an Office employee outside every configured zone (or your browser didn't share your location). Move to a valid location and try again, or ask HR to check the zone configuration.

"I can't submit my expense claim"

The category you picked requires a receipt. Add at least one under `+ Add receipt`, then submit.

"When will my approved expense actually get paid?"

As soon as HR calculates the payroll run covering your expense's date — there's no separate payment step. It'll show as Reimbursed on your claim once that happens.

"I can't edit my expense claim anymore"

Claims lock the moment you submit them. If it hasn't been decided yet, you can still `Cancel` it and create a corrected one.

"Can I turn off notifications?"

In-app notifications always stay on so you never miss a decision that affects you. You can turn off the *email* copy per event type from the Notifications page.

"I don't see Recruitment in my menu"

It's only visible to HR Admins, Super Admins, and Hiring Managers. Regular employees don't see it — this release has no public or candidate-facing side.

"Can candidates apply directly through the app?"

Not yet — there's no public careers page or candidate login in Sprint 2. HR or a recruiter enters every candidate manually.

"What happens after a candidate accepts an offer?"

HR records the acceptance, then selects `Convert to employee` on the application. That instantly creates the person's employee record and login — they can sign in right away with the temporary password HR gives them.
